DETAILED ACTION

Allowable Subject Matter

1. Claims 1-12 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The prior art of record issued to Shimakawa fails to teach or suggest a broadcast receiver which detects the reception status of radio waves from other stations without deteriorating the reception status of a currently-receiving station, in digital broadcasting where consecutive time series data is transmitted. The amount of time-based interleave applied to the currently-receiving data is determined so that the reception status of the radio waves from other stations is detected while the reception of the currently-receiving broadcast station is interrupted within the extent where missing data can be recovered by such interleave and error correction processing on demodulation. Shimakawa does not teach a station selection control part for generating the station selection command using the result from the signal analyzing part within the broadcast receiver, and particularly, Shimakawa is silent on a reception status detecting part for interrupting, during receiving one broadcast station, and based on the station selection command, then detecting a reception status of radio waves from other stations as cited in claims 1 and 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
